

# Ana Clara Monteiro

London, UK · +52 33 2259 1583 · [anaserinet.mot@gmail.com](mailto:anaserinet.mot@gmail.com) · [linkedin.com/in/ana-monteiro](https://www.linkedin.com/in/ana-monteiro) · [github.com/anaserinet](https://github.com/anaserinet) · [Portfolio](#)

## EDUCATION

**King's College London** — BSc Computer Science, *First Class Honours* **Sept 2024 – July 2027**

- Relevant modules: Data Structures & Algorithms, Computer Systems, Database Systems, Software Engineering

**Tecnológico de Monterrey, MX** — Foundation Year in Engineering · GPA 92/100 (3.7/4.0) **Aug 2023 – June 2024**

- Mathematics: Statistical Analysis, Differential Equations, Fundamental & Intermediate Mathematical Modeling

## EXPERIENCE

**President of King's Labs** **Sept 2026 – Present**

*King's Labs — King's Business Club, London*

- Deliver 4+ production applications per year for external clients by leading a 7-person engineering team through scoping, development and deployment, writing and reviewing code alongside the team.
- Train 20+ students from fundamentals to a deployed web application in 8 weeks by running King's Labs Academy: weekly hands-on build sessions and code reviews.

**Information & Digital Technology Intern** · *Python, SAP, Azure, Power BI, SQL* **June – Sept 2026**

*Shell, London*

- Worked on AI automation initiatives for SAP testing, by validating AI agent executions across DEV/QA environments and diagnosing failed runs from execution logs and SAP behaviour, driving reliability improvements projected to unlock at least 10% efficiency savings across the programme in its initial phase.
- Validated the SAP BI 2025 upgrade pre-production, by building and documenting a full sandbox environment on Azure end to end (VM provisioning, service accounts, Kerberos/SETSPN SSO, SSL, SAP BI install) through 25+ working sessions with a technical lead.
- Built leadership-level dashboards in Power BI that consolidate Test Execution data from global SAP transformation initiatives into one place, giving leadership a single view of progress that previously lived across fragmented reports.

**Undergraduate Research Fellow (KURF)** · *Unity, C#, HLSL, Meta Quest 3* **June – Sept 2026**

*Civic & Responsible AI Lab, King's College London*

- Built 2 Unity VR environments for the lab's upcoming user studies on culturally sensitive VR experiences for minority ethnic communities; findings intended for academic publication.
- Built a full point-cloud rendering pipeline in Unity: from photogrammetry scans (CloudCompare, MeshLab, Blender) to a custom GPU-animated renderer with hand-written HLSL shaders and zero per-frame CPU cost, deployed on Meta Quest 3.

**CTO & Co-founder** · *Python, FastAPI, PostgreSQL, Redis, TypeScript, React, AWS* **Feb 2026 – Present**

*Oppero*

- Grew Oppero to 3 paying clients by leading engineering for a B2B platform that builds AI employees for companies in LATAM.
- Designed the architecture and the 3-month plan to ship it, then built the platform myself while coordinating the team: async FastAPI services, multi-tenant PostgreSQL with row-level security, Redis job queues and AI pipelines.

**Frontend UI/UX Engineer** **Nov 2025 – Aug 2026**

*King's Business Club, London*

- Connected students and alumni by building Alumni Space, a place where KBC alumni exclusively can connect and network.
- Maintained 8+ production websites for the club.

**Software Engineer Intern** · *JavaScript, Java, HTML/CSS* **June – Aug 2025**

*Positivo S+, Guadalajara, Mexico*

- Delivered features for 3 client-facing products in an Agile Scrum team, with code reviews and technical documentation alongside senior engineers.

## SKILLS

**Languages:** Python, SQL, TypeScript/JavaScript, Java, C#, C++

**Systems & Data:** Azure, SAP BI platform, Power BI, FastAPI, PostgreSQL, Redis, async services and job queues, Docker, AWS, machine learning (scikit-learn, pandas), LLM/AI integration, GPU/shader programming (HLSL)

**Practices:** Test-driven development, code review, Git/GitHub, system architecture, Agile (Scrum)

**Spoken:** English (fluent), Spanish (native), Portuguese (native), French (conversational), German (beginner)

## AWARDS

- **Technovation 2024** — 1st Place (Verde Vivo, mobile app for environmental change)
- **Tech4Good Hackathon** — 2nd Place (KiddyByte, Enactus)
